1 [Intelligent] Data Scientist/ AI Developer

Intelligent are looking for a bright Machine Learning Engineer to join our growing engineering team in Athens.

Who We Are

Intelligent provides software solutions to help large corporations achieve digital transformation through the usage of Big Data and ML-powered Analytics. Our platform enables industrial deployment of AI models as part of integrated predictive analytics solutions for various domains such as Banking/Financial Institutions (Risk, Marketing), Retail (Recommendation), Telecommunications (Forecasting, KPI modelling), Compliance (Image Processing). We also perform research and development activities that involve state-of-the-art ML techniques (e.g. LSTM, CNN, GAN, ODENet, GNN) for our product roadmap.

What You Will Be Doing

- Design and develop new predictive machine learning and artificial intelligence algorithms for multiple industrial domains
- Integrate ML models into the production pipeline of our solutions
- Analyze datasets to identify patterns and extract insights
- Visualize and present dataset findings and features

1.1 Requirements:

- MSc in Artificial Intelligence, Data Science, Statistics or other related fields
- Minimum 1 year of experience in data science/ ML using at least one of Python, Scala & Java
- Strong SQL knowledge is required for data probing/ preparation
- Knowledge of descriptive statistics, correlation analysis and hypotheses testing
- Experience in applied traditional/shallow learning techniques for supervised and unsupervised tasks (scikit-learn, other)
- Verified model tuning experience including model performance analysis, error KPIs and hyperparameter tuning via cross validation techniques
- Experience at least one python deep learning framework for neural networks: TensorFlow, Keras, PyTorch
- Industrial or academic experience with at least one deep-learning model family (RNN, CNN, GAN, DRL, DBN, etc.)
- Knowledge of code version control via Git

1.2 Nice to have:

- MSc in Artificial Intelligence, Data Science, Deep learning or related fields.
- Experience with ML-Ops framework adaptation (e.g. ML-Flow-Tracking, PyCaret)
- Knowledge of data science and data visualization tools (Jupyter, Superset, Zeppelin or other)
- Experience with Big Data - infrastructure & query engines (Spark, HDFS, Hive, Impala, Trino) as well as Big ML tools (e.g. SparkML)
- Familiarity in deploying ML models as REST APIs (MLFlow Serve, PyCaret, FastAPI)
- Familiarity with Docker and application packaging

1.3 Other qualifications

- Excellent verbal and written communicational skills in English
- Native or fluent Greek, oral and written
- Eagerness to learn modern technologies
- Ability to deliver in time-critical situations in an organized way
- Analytical capabilities and attitude to problem solving
- Team motivation

1.4 Benefits

- Highly competitive salary based on your skills, reviewed upwards on a regular basis, based on your performance.
- Participation in state-of-the-art projects and tech challenges
- Personal and professional development, amongst industry experts and talented people
- Continuous learning, having access to broad resources for professional and personal development
- Friendly environment and fun team members
- Modern workspace

Commitment to Equal Employment Opportunity: All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, age, or other characteristics.

1.5 Contact

Candidates should send their CVs to: [hr\[at\]incelligent.net](mailto:hr@incelligent.net), using the subject: [Data Scientist-AI].

We respect your personal data. All personal information in your application and CV will remain strictly confidential.

2 [Incelligent] React Developer

Who We Are

Incelligent provides software solutions to help large corporations achieve digital transformation through the usage of Big Data and ML-powered Analytics.

What are we looking for

As a Frontend Engineer at Incelligent your primary focus will be on developing user interface components using Typescript and React. You will ensure that these components and the overall application are robust and easy to maintain. You will coordinate with the rest of the team working on different layers of the stack. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality product is important.

2.1 Responsibilities

The role requirements below are just an indication of what we're looking for - sometimes the perfect candidate is far more or less experienced than we anticipated. If you think that might be your case, please reach out and let us know!

You should have a good understanding of best practices of web development and be able to apply them in web development (ES11, JS). Specifically, you have:

- Experience with React using Typescript
- Strong proficiency in JavaScript, including DOM manipulation and the JavaScript object model
- Ability to translate designs and wireframes into high quality code
- Familiarity with consuming REST APIs
- Experience with common front-end development tools such as create-react-app, Webpack, NPM, etc.
- Familiarity with ECharts.js and Map-gl libraries will be greatly appreciated.

2.2 Requirements

- Bachelor's degree in software engineering and/or Information technology or equivalent professional experience
- The ideal candidate should have at least 1 year of professional experience building high quality react-based applications.
- Ability to understand business requirements and translate them into technical requirements

2.3 Other qualifications

- Excellent verbal and written communicational skills in English
- Native or fluent Greek, oral and written
- Initiative, strong sense of accountability and ownership of actions
- Effective time management & prioritization
- Agility, enthusiasm, and self-motivation

2.4 Benefits

- Highly competitive salary, reviewed upwards on a regular basis, based on performance
- Remuneration based on your experience and skills
- Participation in state-of-the-art and large-scale projects
- Personal and professional development, amongst industry experts
- Continuous learning

- Modern workspace
- Dynamic team with fresh ideas

Commitment to Equal Employment Opportunity: All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, age, or other characteristics.

2.5 Contact

Candidates should send their CVs to: [hr\[at\]incelligent.net](mailto:hr@incelligent.net), using the subject: [React Developer].

We respect your personal data. All personal information in your application and CV will remain strictly confidential.

3 [Intelligent] Big Data Engineer

We are looking for a bright Big Data Engineer to join our growing engineering team in Athens.

Who We Are

Intelligent provides software solutions to help large corporations achieve digital transformation through the usage of Big Data and ML-powered Analytics.

What You Will Be Doing

- Implementing and maintaining scalable streaming and batch data pipelines over multiple data sources: Our codebase is in Python, Java & Scala, and our infrastructure is based on open-source Apache projects.
- Monitoring existing pipelines, identifying ways of innovating, improving, and resolving problems
- Cooperate with other team members to the architectural design and implementation of data processes.

3.1 Minimum Requirements

- Bachelor's degree in Electrical & Computer/ Electronic engineering, Computer Science, or other related fields
- Minimum 1 year of experience in data engineering; Strong knowledge of SQL is required
- Minimum 1 year of experience of programming with at least one of Java, Scala, Python languages
- Good command of Spark API; Scala API experience is a plus
- Familiarity with the Hadoop ecosystem, incl. HDFS, Hive, Impala
- Experience with relational databases such as PostgreSQL, MySQL, Oracle
- Experience with development background creating pipelines and complex data transformations and manipulations

Nice to have

- Experience with workflow management tools like Airflow, NiFi, etc.
- Experience with modern data architectural and design patterns is a plus.
- Knowledge of Apache Kafka or other message/event queues
- Experience of cloud services (Microsoft Azure, AWS, Google Cloud Platform)
- Experience with Cloudera Distribution is a plus
- Familiarity with Docker and Kubernetes

3.2 Other qualifications

- Excellent verbal and written communicational skills in English
- Native or fluent Greek, oral and written
- Eagerness to learn modern technologies
- Ability to deliver in time-critical situations in an organized way
- Team motivation

3.3 Benefits

- Highly competitive salary, reviewed upwards on a regular basis, based on your performance
- Participation in state-of-the-art projects and tech challenges
- Personal and professional development, amongst industry experts and talented people
- Continuous learning, having access to broad resources for professional and personal development
- Friendly environment and fun team members, with fresh ideas
- Modern workspace, at a very good location

Commitment to Equal Employment Opportunity: All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, age, or other characteristics.

3.4 Contact

Candidates should send their CVs to: [hr\[at\]incelligent.net](mailto:hr@incelligent.net), using the subject: [Big Data Engineer].

We respect your personal data. All personal information in your application and CV will remain strictly confidential.

4 [WINGS] R&D Engineer (AI)

4.1 Description

WINGS ICT Solutions is seeking for an R&D Engineer, to be involved in the development of orchestration, management and diagnostic components for cloud-oriented platforms. As a research engineer, the successful candidate will work as part of a team, while also being independent, will investigate, resolve interesting research problems and gain expertise in beyond the state-of-the-art technologies. The successful candidate will have the opportunity to be heavily involved in the architectural design, implementation, and testing/verification of experimental prototypes, using Machine Learning techniques and Artificial Intelligence algorithms. Finally, she/he will configure and experiment with existing systems and in-house developed tools.

4.2 Requirements

- Bachelor's Diploma in Electrical & Computer/Electronic engineering, Computer Science, Network or Telecommunications Engineering.
- MSc in the afore-mentioned areas will be considered as a plus.
- Experience in similar development activities, such as R&D projects and team-oriented projects is desirable.
- Software design & development skills (Python and/or Go)
- Understanding of ML techniques and AI algorithms
- Experience with Linux and bash scripting
- Familiarity with version control tools (Git)
- Ability to contribute technical reports

4.3 Other Qualifications

- Excellent verbal and written communicational skills in English
- Native or fluent Greek, oral and written
- Initiative, strong sense of accountability and ownership of actions
- Effective time management & prioritization
- Agility, enthusiasm, and self-motivation

4.4 Benefits

- Highly competitive salary, reviewed upwards on a regular basis, based on your performance
- Participation in state-of-the-art projects and tech challenges
- Personal and professional development, amongst industry experts and talented people
- Continuous learning, having access to broad resources for professional and personal development
- Work with state-of-the-art technologies
- Friendly environment and fun team members, with fresh ideas

Commitment to Equal Employment Opportunity: All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, age, or other characteristics.

4.5 Contact

Candidates should send their CVs to: [hr\[at\]wings-ict-solutions.eu](mailto:hr[at]wings-ict-solutions.eu), using the subject: [R&D Engineer].

We respect your personal data. All personal information in your application and CV will remain strictly confidential.

5 [WINGS] Research Engineer (Partial work abroad)

5.1 Description

WINGS ICT Solutions is looking for an engineer with experience in development activities, R&D projects and team-oriented projects.

Note: The offered position includes a contract for working abroad, apart from the collaboration with WINGS in Athens.

5.2 Requirements

Necessary skills:

- Experience in Data Science/ML using at least one of Python, Java
- Experience with wireless networks & respective technologies.

Educational Requirements:

- (Technical) University degree in Information and Communications Technologies, Computer Science or Electrical & Computer Engineering (or similar)
- MSc in Artificial Intelligence, Data Science, Statistics or other related fields will be considered as a plus.

5.3 Other qualifications:

- Excellent verbal and written communicational skills in English
- Native or fluent Greek, oral and written
- Availability and willingness to work abroad
- Initiative, strong sense of accountability and ownership of actions
- Willingness to learn and curiosity
- Problem solving attitude
- Ability to perform within a team
- Flexibility, enthusiasm, positive attitude

5.4 Benefits

- Participation in state-of-the-art projects and tech challenges
- Personal and professional development, amongst industry experts and talented people
- Continuous learning, having access to broad resources
- Friendly environment and fun team members, with fresh ideas

Commitment to Equal Employment Opportunity: All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, age, or other characteristics.

5.5 Contact

Candidates should send their CVs to: [hr\[at\]wings-ict-solutions.eu](mailto:hr[at]wings-ict-solutions.eu), using the subject: [Research_partially_abroad].

We respect your personal data. All personal information in your application and CV will remain strictly confidential.

6 [WINGS] Data Scientist (Computer Vision)

6.1 Description

WINGS ICT WINGS ICT Solutions is looking for an enthusiastic Data Scientist with experience in Computer Vision (deep learning). The successful candidate will be:

- Working as part of a growing team, while also being independent
- Resolving interesting problems and gaining expertise in state-of-the-art technologies
- Using Machine Learning techniques and Artificial Intelligence algorithms
- Having the opportunity to be involved in the design, implementation, of new Computer Vision solutions related to our products, existing systems and in-house developed tools.

6.2 Requirements

Educational requirements:

- Candidates must have a Bachelor's Diploma in Compute Science, Electrical & Computer/Electronic engineering, Networks, Telecommunications or other relevant fields
- Master's Degree in the afore-mentioned areas will be considered as a strong plus

Necessary skills:

- At least 1 years of experience in a similar role as a Data Scientist
- Understanding of ML techniques and AI algorithms
- Experience in Computer Vision projects
- Excellent knowledge of Python and tools related to deep learning/ computer vision (PyTorch, OpenCV, TensorFlow etc.)

6.3 Other Qualifications:

- Excellent verbal and written communicational skills in English
- Native or fluent Greek, oral and written
- Initiative, strong sense of accountability and ownership of actions
- Effective time management & prioritization
- Agility, enthusiasm, and self-motivation

6.4 Benefits

- Highly competitive salary, reviewed upwards on a regular basis, based on performance
- Remuneration based on your experience and skills
- Participation in state-of-the-art and large-scale projects
- Personal and professional development, amongst industry experts
- Continuous learning
- Modern workspace, at a very good location
- Dynamic team with fresh ideas
- Commitment to Equal Employment Opportunity

Commitment to Equal Employment Opportunity: All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, age, or other characteristics.

6.5 Contact

Candidates should send their CVs to: [hr\[at\]wings-ict-solutions.eu](mailto:hr[at]wings-ict-solutions.eu), using the subject: [Data_Scientist].

We respect your personal data. All personal information in your application and CV will remain strictly confidential.

7 [WINGS] Front End Developer (React/ Angular)

7.1 Description

WINGS ICT Solutions is looking for an engineer/developer with experience in Front end development, business and team-oriented projects.

The main responsibilities will involve:

- Collaboration with Web Developers in the team and designers on front end application development,
- Understand and Work on business goals, user needs and technical constraints,
- Development of cutting-edge web applications that look and perform superbly across all platforms,
- Enhancing the performance and reliability of our current web-based application features,
- Concept exploration and prototyping UI designs with the latest technologies.

7.2 Requirements

Educational requirements:

- Bachelor's Degree in (Technical) University degree in Information and Communications Technologies, Computer Science, Electrical & Computer Engineering or equivalent

Necessary skills:

- At least 1-2 years of demonstrable experience on industry projects
- Good knowledge and understanding of JavaScript fundamentals
- Experience with Angular 11+ OR React
- Experience with CSS and HTML
- Experience with version control system (Git)

Nice to have skills:

- Mobile development experience will be considered as a plus
- Experience in Typescript
- Experience in writing Unit tests and e2e tests
- Familiarity with CI/CD tools

7.3 Other qualifications

- Excellent verbal and written communicational skills in English
- Native or fluent Greek, oral and written
- Communicational skills and team working attitude
- Analytics capabilities and attitude to problem solving
- Flexibility, enthusiasm, positive attitude
- Highly detail oriented, self-motivated, self-managed and organized
- Team motivation

7.4 Benefits

- Remuneration based on your experience and skills.
- Highly competitive salary, reviewed upwards on a regular basis, based on your performance.
- Participation in state-of-the-art projects and tech challenges
- Personal and professional development, amongst industry experts and talented people
- Continuous learning, having access to broad resources for professional and personal development
- Work with state-of-the-art technologies
- Friendly environment and fun team members, with fresh ideas

- Modern workspace, at a very good location

Commitment to Equal Employment Opportunity: All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, age, or other characteristics.

7.5 Contact

Candidates should send their CVs to: [hr\[at\]wings-ict-solutions.eu](mailto:hr[at]wings-ict-solutions.eu), using the subject: [Frontend_Developer].

We respect your personal data. All personal information in your application and CV will remain strictly confidential.

8 [WINGS] Backend Developer

8.1 Description

WINGS ICT Solutions is looking for a Python Backend software engineer that will be responsible for the design, development and deployment of RESTful APIs and web services, along with maintaining and improving our existing services.

8.2 Requirements

Educational requirements:

- Candidates must have a Bachelor's Degree in Information and Communications Technologies, Computer Science, Electrical & Computer Engineering or equivalent

Essential technical skills:

- At least 1 year working experience as a backend developer
- In-depth knowledge of Python or Java
- Experience in relational databases (PostgreSQL, MySQL)
- Knowledge of RESTful API design principles
- Understanding of code versioning tools, such as Git

Nice to have:

- Familiarity of front-end technologies
- Experience with Development in cloud (or Virtual) environments, such as AWS
- Familiarity with Docker
- Object-Relational mapping tools
- Experience in non-relational databases
- Familiarity with CI/CD tools

8.3 Other qualifications

- Excellent verbal and written communicational skills in English
- Native or fluent Greek, oral and written
- Initiative, strong sense of accountability and ownership of actions
- Effective time management & prioritization
- Agility, enthusiasm, and self-motivation

8.4 Benefits

- Highly competitive salary, reviewed upwards on a regular basis, based on your performance
- Participation in state-of-the-art projects and tech challenges
- Personal and professional development, amongst industry experts and talented people
- Continuous learning, having access to broad resources for professional and personal development
- Work with state-of-the-art technologies
- Friendly environment and fun team members, with fresh ideas
- Modern workspace, at a very good location

Commitment to Equal Employment Opportunity: All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, age, or other characteristics.

8.5 Contact

Candidates should send their CVs to: [hr\[at\]wings-ict-solutions.eu](mailto:hr[at]wings-ict-solutions.eu), using the subject: [Backend_Developer].

We respect your personal data. All personal information in your application and CV will remain strictly confidential.

9 [WINGS] Hardware/ Embedded Software Engineer

9.1 Description

WINGS ICT Solutions is looking for an enthusiastic hardware/embedded software engineer to join its growing team.

9.2 Requirements

Educational requirements:

- Bachelor's degree in Electronics Engineering, Computer Engineering or equivalent.
- Master's degree will be considered as a plus.

Required experience in:

- More than 1 year of experience in electrical/electronics' environment and design of embedded systems
- Knowledge of circuit design/ PCB design, STM32 microprocessor, calculations, simulations
- Experience in lab processes and tools usage, measuring/ evaluating/ debugging HW/ PCB designs.
- Programming experience in Python/ C/ C++
- Familiar with PCB tools including schematic, layout, and component data management.

9.3 Other Qualifications

- Excellent verbal and written communicational skills in English
- Native or fluent Greek, oral and written
- Initiative, strong sense of accountability and ownership of actions
- Effective time management & prioritization
- Agility, enthusiasm, and self-motivation

9.4 Benefits

- Highly competitive salary based on your skills, reviewed upwards on a regular basis, based on your performance
- Participation in state-of-the-art projects and tech challenges
- Personal and professional development, amongst industry experts and talented people
- Continuous learning, having access to broad resources for professional and personal development
- Friendly environment and fun team members
- Modern workspace, at a very good location

Commitment to Equal Employment Opportunity: All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, age, or other characteristics.

9.5 Contact

Candidates should send their CVs to: [hr\[at\]wings-ict-solutions.eu](mailto:hr[at]wings-ict-solutions.eu), using the subject: [Hardware/ Embedded_Engineer].

We respect your personal data. All personal information in your application and CV will remain strictly confidential.

10 [WINGS] Robotics Engineer

10.1 Description

WINGS ICT Solutions is looking for a Robotics Engineer to join our growing engineering team in Athens. The main responsibilities will include:

- Conduct research for determining the parameters of a robotic application
- Preparation of prototypes and contribution to the design of robotics systems
- Develop and implement software that will control robots
- Develop processes, perform tests and quality controls
- Develop reports/documentation for robotic systems
- Troubleshooting
- Staying up to date on the latest developments in the robotics field

10.2 Requirements

Educational requirements:

- Candidates must have a bachelor's degree in Engineering, Computer Science or similar field

Essential technical skills:

- At least 1 year hands' on experience in ROS and Python
- Experience with ROS2 and C++ will be considered as a plus
- Knowledge of 3D design tools (i.e. Solidworks)

10.3 Other Qualifications

- Excellent verbal and written communicational skills in English
- Native or fluent Greek, oral and written
- Initiative, strong sense of accountability and ownership of actions
- Effective time management & prioritization
- Agility, enthusiasm, and self-motivation

10.4 Benefits

- Highly competitive salary, reviewed upwards on a regular basis, based on performance
- Participation in state-of-the-art projects and tech challenges
- Continuous learning, having access to broad resources for professional and personal development
- Work with state-of-the-art technologies,
- Friendly environment and fun team members, with fresh ideas.

Commitment to Equal Employment Opportunity: All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, age, or other characteristics.

10.5 Contact

Candidates should send their CVs to: [hr\[at\]wings-ict-solutions.eu](mailto:hr[at]wings-ict-solutions.eu), using the subject: [Robotics_Engineer].

We respect your personal data. All personal information in your application and CV will remain strictly confidential.

11 [WINGS] AR-VR/ Unity 3D Developer

WINGS ICT Solutions is a company that delivers innovative, end-to-end digital solutions (software and hardware) and transformations for vertical sectors, namely; Environment/Nature, Utilities and Infrastructures, Production and Manufacturing and Service sectors, based on its extensive expertise in IoT, wireless infrastructures, AI and AR/VR.

11.1 Description

We are looking for AR/ VR/ Unity 3D Developer with proven experience in various projects. The main responsibilities of the successful candidate will involve:

- Design and implement AR/ VR/ Unity applications for various WINGS projects/ products with the best possible responsiveness and functionality, based on requirements and feedback from management, internal team or clients.
- Investigate, when necessary new AR/ VR/ 3D modeling solutions and make recommendations.
- Contribute to technical presentations and technical reports.
- Prepare drafts and mockups in collaboration with internal teams.

11.2 Requirements

Educational requirements:

- Bachelor's and/or Master's degree in Computer Science, Computer Engineering, Digital Arts or similar field

Necessary skills:

- Experience in Unity 3D game engine
- Programming experience in C#
- Virtual reality applications development (Oculus or similar VR headset & goggles).
- Augmented reality applications development (AR Core, Vuforia or similar).
- 3D modeling experience (3Ds Max, Blender or similar)
- Understanding of web architecture and RESTful APIs
- Firm understanding of IoT/cloud architectures and principles (IoT Protocols, IoT/edge/cloud data communication etc.)
- Familiarity with systems administration, performance tuning, and system monitoring

Desired skills:

- Working experience in games design will be considered as a strong plus
- Working experience in robotics and simulations will be considered as a strong plus
- Working experience with 3D scanners will be considered as a strong plus

11.3 Other qualifications:

- Excellent verbal and written communicational skills in English
- Native or fluent Greek, oral and written
- Initiative, strong sense of accountability and ownership of actions
- Effective time management & prioritization
- Agility, enthusiasm, and self-motivation

11.4 Benefits

- Highly competitive salary, reviewed upwards on a regular basis, based on performance.
- Remuneration based on your experience and skills

- Participation in state-of-the-art and large-scale projects
- Personal and professional development, amongst industry experts
- Continuous learning
- Modern workspace, at a very good location

Commitment to Equal Employment Opportunity: All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, age, or other characteristics.

11.5 Contact

Candidates should send their CVs to: [hr\[at\]wings-ict-solutions.eu](mailto:hr[at]wings-ict-solutions.eu), using the subject: [AR/VR_Developer].

We respect your personal data. All personal information in your application and CV will remain strictly confidential.

12 [WINGS] Android Developer

12.1 Description

WINGS ICT Solutions is looking for a mobile software engineer that will be responsible for the design and development of native Android applications.

12.2 Requirements

Educational Requirements:

- Candidates must have a Bachelors Degree in Information and Communications Technologies, Computer Science, Electrical & Computer Engineering or equivalent

Required experience in:

- Designing and building advanced applications for the Android platform using Android Studio, etc.
- Working with outside data sources and APIs
- Object Oriented Programming and coding best practices, especially in Java
- Working with remote data via REST and JSON

Desirable qualifications (optional):

- Working knowledge of the general mobile landscape, architectures, trends, and emerging technologies
- Unit-testing code for robustness, including edge cases, usability, and general reliability
- Bug fixing and improving application performance

12.3 Other qualifications

- Excellent verbal and written communicational skills in English
- Native or fluent Greek, oral and written
- Initiative, strong sense of accountability and ownership of actions
- Effective time management & prioritization
- Agility, enthusiasm, and self-motivation

12.4 Benefits

- Highly competitive salary, reviewed upwards on a regular basis, based on performance
- Remuneration based on your experience and skills
- Participation in state-of-the-art and large-scale projects
- Personal and professional development, amongst industry experts
- Continuous learning
- Modern workspace, at a very good location
- Dynamic team with fresh ideas

Commitment to Equal Employment Opportunity: All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, age, or other characteristics.

12.5 Contact

Candidates should send their CVs to: [hr\[at\]wings-ict-solutions.eu](mailto:hr[at]wings-ict-solutions.eu), using the subject: [Android_Developer].

We respect your personal data. All personal information in your application and CV will remain strictly confidential.

13 [WINGS] IT/ Networks Engineer

13.1 Description

WINGS ICT Solutions is looking for an IT/ Networks Engineer. The candidate will be responsible for:

- Supporting and maintaining the company's software, hardware & cloud infrastructure.
- Setting-up network components and devices.
- Analysing and resolving incidents and requests regarding use of application software or hardware.
- Troubleshooting and configuring operational problems
- Implementing networks/ data security measures and maintaining backup policies

13.2 Requirements

Educational requirements

- Bachelor's Degree in Information and Communications Technologies, Computer Science, Electrical & Computer Engineering, or similar field.

Necessary skills

- At least 1 year experience as an IT/Network Engineer.
- In-depth knowledge of computer hardware, software, networks and experience with TCP/ IP.
- Familiarity with systems administration, performance tuning, and system monitoring.
- Hands-on experience administering cloud infrastructure.

Desired skills

- Knowledge of scripting and/or high-level programming languages would be considered as a plus
- Relevant Certifications in IT/Network Support

13.3 Other qualifications

- Excellent verbal and written communicational skills in English
- Native or fluent Greek, oral and written
- Initiative, strong sense of accountability and ownership of actions
- Effective time management & prioritization
- Agility, enthusiasm, and self-motivation

13.4 Benefits

- Competitive salary, reviewed upwards on a regular basis, based on performance
- Remuneration based on your experience and skills
- Participation in state-of-the-art and large-scale projects
- Personal and professional development, amongst industry experts
- Continuous learning
- Modern workspace, at a very good location
- Dynamic team with fresh ideas

Commitment to Equal Employment Opportunity: All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, pregnancy, disability, age, or other characteristics.

13.5 Contact

Candidates should send their CVs to: [hr\[at\]wings-ict-solutions.eu](mailto:hr[at]wings-ict-solutions.eu), using the subject: [IT/ Networks_Engineer].

14 [WINGS] Testing Engineer

14.1 Description

WINGS ICT Solutions is looking for an Experienced Testing Engineer to join the growing team. The main responsibilities of the successful candidate will involve:

- Understanding business requirements, identify test environment and dependencies on external /internal applications
- Creating optimized test scenarios and executing test cases to verify that a systemic/ application is built as per the requirements,
- Performing functional testing (automation or manual)
- Estimating testing efforts, report status, log and document defects, support defect resolution,
- Analyzing the test outcome for continuous improvements.

14.2 Requirements

Educational requirements

- Bachelor's degree in Computer Science, Computer Engineering or similar field

Necessary skills

- At least 1 year of working experience as a testing engineer (automation or manual)
- Understanding of testing methodologies
- Good knowledge of Jira Testing Tool or other testing tools and methods
- Strong documentation skills, experience in documenting test scenarios
- Ability to interact with client facing, technology and project management teams
- Familiarity with test automation tools and frameworks (e.g, Rational tester, Jmeter, Cucumber etc.) will be considered positively

Desired skills

- Working experience in the banking sector will be considered as a strong plus

Other qualifications:

- Attention to detail
- Excellent verbal and written communicational skills in English
- Native or fluent Greek, oral and written
- Initiative, strong sense of accountability and ownership of actions
- Effective time management & prioritization
- Agility, enthusiasm, and self-motivation

14.3 Benefits

- Highly competitive salary, reviewed upwards on a regular basis, based on performance.
- Remuneration based on your experience and skills
- Participation in state-of-the-art and large-scale projects
- Personal and professional development, amongst industry experts
- Continuous learning
