

Business Analyst

As a Business Analyst at Founderhood, you analyse our business and the entrepreneurial environment. This may include discussing fundamental business plans (i.e. strengths, weaknesses, practicability and usability), analyzing and evaluating the implementation of business plans and their impact, producing database reports, providing reviews and comments on other business reports, and analyzing information to determine variable solutions and to make recommendations. Additionally, you will work closely together with our business consultant.

Our Business analyst interns are playing a key role and individual contributors to our overall strategy to consult businesses and entrepreneurs. We encourage you as an intern to have self-responsibility in all your tasks. You will evaluate the performance of processes, create new systems and procedures, and you will work closely with our team. Innovative ideas located outside the box, applied creativity, and an inquisitive mindset are very desirable.

Expectations:

From our candidates, we expect to have strong analytical skills, effective communication, good writing and organizational skills, critical acumen, proficiency in problem-solving, and good knowledge of Microsoft Office 2016 (Word, PowerPoint, Excel) and WordPress.

An advantage would be academic knowledge of management, economics, business or in a relevant field.

Sounds interesting? Come and work with us! Send us your CV or a short video describing yourself and why you would like to join us at: joinus@thefounderhood.com.
